

RS1800P SERIES Petrol Driven Rotary Screw Compressor

Continuously Variable Idle Control

Constant Air Flow and Pressure

Removable Petrol Tank For Refuelling

Honda V-Twin Ohv Engine

Rugged Construction

Will Operate 41kg (90lb) Breaker

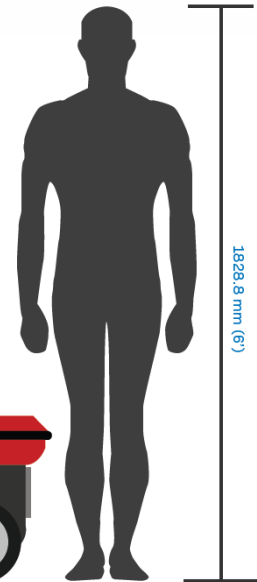

DESCRIPTION

The Worlds Smallest Petrol Rotary Screw Compressor

The RS1800P overcomes noise regulations, access problems and avoids extra road costs. Its small form factor and fold away handle makes maneuvering the worksite easy.

Built tough for the harsh Australian environment, able to operate in ambient temperatures up to 50°C. The low maintenance design gives you low operating costs over a long service life, providing greater value for money and effective return on investment.

Powered by Honda's V-Twin engine delivers the RS1800 P the power to handle any job site task.

Powered by **HONDA**

Design and made in France
