

Focus Australian Made Tank Mounted Portable Petrol Air Compressors

9.8cfm – 28.5cfm

Quality Honda Petrol Drive Engines

Full range of spares & service available

2 Years Warranty

Only copper piping used ensure longevity of all connections

All valves and fittings are forged brass for longevity

Heavy-Duty Cast-Iron Pump to ensure 100% duty cycle if required

DESCRIPTION

Covering from 9.8cfm to 28.5cfm, our Australian Manufactured Petrol and Diesel Piston Compressor range guarantees market leading reliability, efficiency and durability. With models in both Honda Petrol Engines and Yanmar Diesel Engines, only the most heavy duty and tested components are utilized to guarantee longevity, reliability and productivity.

The Focus Australian Made Piston Compressors utilize a Cast-Iron Pump instead of the common aluminium pumps to ensure the compressors can operate at 100% duty cycle if required. More cost effective than the screw compressor range, the Australian made piston compressor range is ideal for smaller operations or where a portable but reliable source of compressed air is required.

MODEL	MOTOR POWER		PRESSURE		FLOW RATE FAD		Tank Size	Cylinder	POWER	DIMENSIONS	WEIGHT
